

SUMMARY

Full-stack developer specializing in React, scalable backend systems, and AI-powered applications. Experienced in building production-ready systems including RAG pipelines, microservices architectures, and real-time APIs. Strong focus on performance optimization, clean architecture, and delivering impactful user experiences.

EDUCATION

Lloyd Institute of Engineering and Technology
Bachelor of Technology (B.Tech), CGPA: 7.6

Jun 2022 – Jun 2026
Greater Noida, Uttar Pradesh

COURSEWORK

- Data Structures & Algorithms
- Object-Oriented Programming
- Web Development
- Software Engineering
- Artificial Intelligence

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, Redux, Zustand, Tailwind CSS, SASS/SCSS, Progressive Web Apps (PWA)

Backend: Node.js, Express.js, REST APIs, Authentication (JWT, OAuth)

Databases: MongoDB, PostgreSQL, MySQL, Redis, Pinecone (Vector DB)

Gen AI: Langchain, AI Integration, Pinecone (Vector DB)

DevOps & Tools: Git, GitHub, Docker, Nginx, CI/CD, AWS (ECS, S3)

PROJECTS

Aurora – LLM Powered RAG System | MERN, Redis, RAG, Gemini API, Pinecone **June 2025**

- Engineered a production-ready RAG-based AI assistant enabling context-aware responses over custom datasets.
- Implemented semantic vector search using Pinecone to enhance retrieval precision and reduce hallucinated outputs.
- Designed modular REST APIs handling AI inference, query processing, and retrieval workflows.
- Implemented JWT-based authentication and role-based access control for secure multi-user access.

ECO Mart with AI Agent | Node.js, Express, MongoDB, Redis, Docker **July 2025**

- Architected a distributed microservices backend managing product, cart, order, and authentication services.
- Developed 20+ REST APIs with optimized MongoDB schemas ensuring scalability and data consistency.
- Implemented event-driven communication using RabbitMQ for asynchronous inter-service messaging and notification processing.
- Built an AI automation agent simulating transactional user workflows and session orchestration.
- Containerized services using Docker to ensure environment consistency and deployment portability.

HACKATHONS

Reimagine Hackathon

2025

Frontend Hackathon – Sheriyans Coding School

- * Built responsive UI clones using React and Tailwind with reusable components.
- * Improved accessibility, performance, and micro-interactions.

Phantom Agents Hackathon

2025

AI & Autonomous Systems Hackathon

- * Developed high-performance, responsive UI solutions under strict time constraints using React and Tailwind.
- * Focused on UX improvements, accessibility, and animation-driven interactions.
